New Lubricating Oil Transfer Tube and Oil Transfer Connection

New Lubricating Oil Transfer Tube and Oil Transfer Connection

Warranty Statement

The information in this document has no effect on present warranty coverage or repair practices, nor does it authorize TRP or Campaign actions.

Contents

This Service/Parts Topic is to introduce a revised lubricating oil pump discharge tube and oil transfer connection. The new discharge tube and connections have been introduced to improve durability of the system components. The new arrangement is only compatible with those engines that have lubricating oil pumps, Part Number 4100711 for the QSK60, and Part Number 4100710 for the QSK45, and can be used as a direct replacement. Engines that have lubricating oil pump part numbers different to those above remain unaffected and no action is required as a result of this topic. The new arrangement went into production at the Daventry Engine Plant on 8th of March 2004. The ESN first was 33156055.

Revised Arrangement.

The revised arrangement consists of a connection elbow fixed to the discharge port of the lube pump, a straight discharge tube and another connection fixed to the engine block. The lubricating oil pump remains unchanged, QSK 60 (Part Number 4100711), and QSK 45 (Part Number 4100710).

Note : This is a product improvement not subject to campaign.

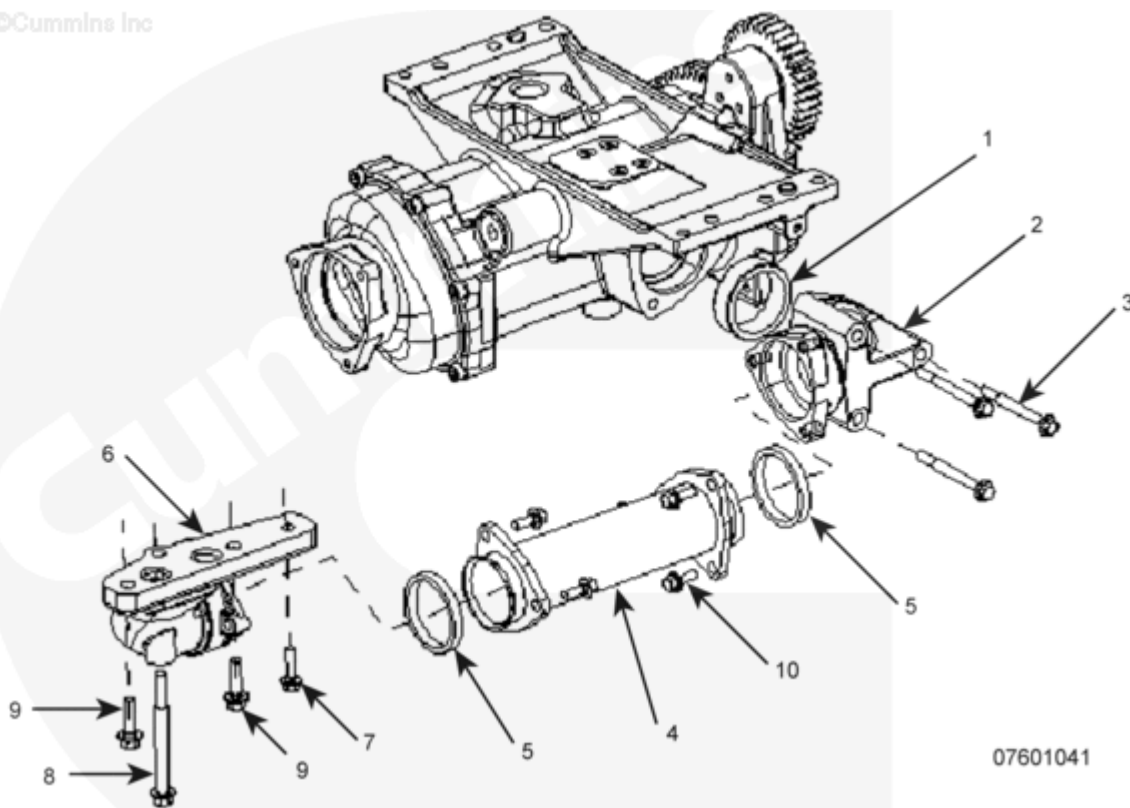

Figure 1

Table 1 below, lists the parts that **must** be ordered when fitting the new components on QSK45/60 engines.

Table 1, Part Required (See Figure 1)

Reference No.	QSK60 Parts	QSK45 Parts	Quantity	Description
1	4916879	4916879	1	Sleeve
2	3636362	3636362	1	Oil transfer connection
3	3914407	3914407	3	Screw, hex flange head cap
4	4916878	4916878	1	Tube, lub oil transfer
5	3089886	3089886	2	Seal, rectangular
6	4916874	4916875	1	Connection, lub oil
7	3089016	3089016	1	Screw, hex flange head cap
8	3089234	3089234	1	Screw, hex flange head cap
9	3920447	3920447	2	Screw, hex flange head cap
10	3902460	3902460	6	Screw, hex flange head cap

Identification

S-Shape Type

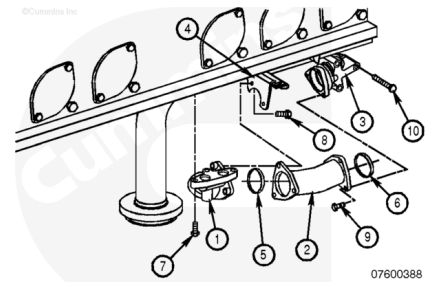

Fitted to lubricating oil pump part numbers:

QSK45 - 4066027

QSK60 - 4065652

Arrangement consists of lubricating oil pump connection (3) and block connection (1), with a steel tube (2) bridging the connections (1) and (3).

Connection (1) has three mounting capscrews. Steel tube has slight bend in its section.

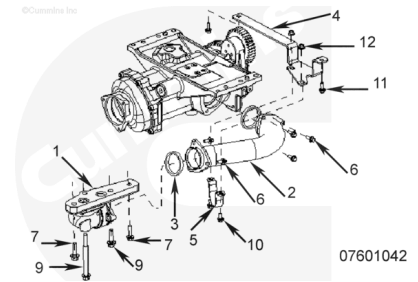

Elbow Type

Fitted to lubricating oil pump part numbers:

QSK45 - 4100710

QSK60 - 4100711

Arrangement consists of block connection (1), with a steel tube (2) which bridges from block connections (1) directly to lubricating oil pump. Transfer tube bracing is also present.

Straight Type

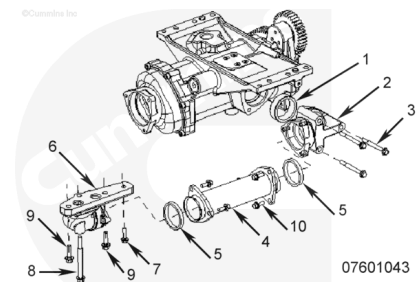

Fitted to lubricating oil pump part numbers:

QSK45 - 4100710

QSK60 - 4100711

Arrangement consists of lubricating oil pump connection (2) and block connection (6), with a steel tube (4) bridging the connections (2) and (6).

Connection (6) has four mounting capscrews. Steel tube is straight in section.
