New Jacket Water Pump	

New Jacket Water Pump

Warranty Statement

The information in this document has no effect on present warranty coverage or repair practices, nor does it authorize TRP or Campaign actions.

Contents

This document details the introduction of a new jacket water pump for use on all Tier 0 and Tier 1 KTA38, K1800, K2000, KTA50, QSK45, QSK60, and QSK78 diesel engines, and the QSK60G gas engines. The new jacket water pumps have a repositioned weep hole and duck bill fitted to the weep hole to prevent dirt ingress, and has been released as a continuous product improvement.

This issue can be identified as excessive water leakage from the weep hole as a result of dirt ingress, which affects the sealing capability of the water seal.

Note : The installation procedure remains unchanged.

Table 1, Jacket Water Pump - Parts Supersession					
Description	Engine Model	Existing Part Number	New Part Number	Engine Serial Number (ESN) First	Effective Date
Pump, Water	KTA38/K1800/K2000	3647029	4372338	33201549	7-Jul-14
	KTA50	3647030	4372339	33201541	7-Jul-14
	QSK45 C/G	3647027	4372336	33201799	31-Jul-14
