Description of Change

- A new lubricating oil pump has been released with a new regulator valve spring.
- To maintain the correct free length and preload the spring is manufactured with a different process than earlier and increased free length specification.

Reason for Change

- There have been reports of low oil pressure and erratic main oil rifle pressure.
- The change in speed in haul truck applications causes the regulator spring to move repeatedly and causes early relaxation of the spring. To maintain the correct free length and preload, the regulator spring with different manufacturing processes has been implemented.

Service Parts Availability

Service parts are available. See Table 1 for part numbers.

Table 1, Service Parts

Part Description	Existing Part Number	Obsolete	Superseded	New Part Number	Quantity Required	Reference
SPRING, PRESSURE REGULATOR	3635142	Yes	Yes	6319697	1	1
PUMP, LUBRICATING OIL	3644520	Yes	Yes	6319711	1	2
PUMP, LUBRICATING OIL	3644518	Yes	Yes	6319710	1	3
PUMP, LUBRICATING OIL	3644516	Yes	Yes	6319705	1	4

Part Identification

The part number is stamped on the part.

Part Inventory Action

- Use existing part number inventory before using the new part number.
- Use the new parts in construction applications **only** until existing inventory stock has been eliminated.

Production Status

Implemented for production. See Table 2.

Table 2, Production Information

ESN First	Build Date ¹	Plant	Engine Model
33232528	12 June 2023	Daventry	QSK60
33232736	28 June 2023	Daventry	QSK45
66307001	12 June 2023	Daventry	QSK78
