Description of Change

This document announces the release of new cylinder head gasket part numbers. The new cylinder head gaskets include the standard thickness, 0.25 mm oversize, 0.5 mm oversize, and 0.75 mm oversize.

Reason for Change

The new cylinder head gaskets have a revised material used on the edge molded grommets. The new material is capable of withstanding higher temperatures. The coolant grommet material remains the same. The process of how the coolant grommets are integrated into the metal gasket carrier has changed.

Service Instructions

To maintain proper engine operation, oversize cylinder head gaskets are needed for blocks which have the top surface or deck machined during overhaul.

The following dimensions **must** be measured to determine the correct oversized cylinder head gasket to be used:

- Block deck to crankshaft centerline (1)
- Block deck to crankshaft bore (2).

See the corresponding Service Manual for more information. Reference Procedure 001-026 in Section 01.

Service Parts Availability

Table 1, Cylinder Head Gasket Part Numbers

Part Description	Obsolete Part Number	New Part Number
Standard Head Gasket	4086225	3649981
0.25 mm Oversize Head Gasket	3635103	3651085
0.5 mm Oversize Head Gasket	4086730	3649982
0.75 mm Oversize Head Gasket	3635104	3651086

Part Compatibility

For part compatibility information, see the corresponding service manual.

Part Inventory Action

Use existing part number inventory before using the new part numbers.

Production Status

Table 2, Production Information				
Product	Part Number	Engine Serial Number (ESN) First	Build Date*	Engine Plant
QSK60 CM500	3649981	33204423	30 Mar 2015	Daventry Engine Plant
*Engine build date can be found on the engine dataplate.
