Description of Change

Engines have had an additional pre-lubrication pressure switch installed in fuel pump drive. First engine serial number (ESN) to have these parts installed from Daventry plant is ESN 33210828. A service parts kit, Part Number 5473011, is available for service up-fit to help ensure proper fuel pump lubrication prior to start.

Reason for Change

The second oil pressure pre-lubrication switch confirms that there is a minimum of 4psi at the fuel pump drive prior to the engine cranking.

Service Instructions

In order to up-fit additional pre-lube oil pressure switch on engines in the field, an adapter must be installed into the fuel pump drive. See Figures 1 through 7.

1. Connect existing oil pressure switch plug. Use Part Number 3903990. See Figure 2.
2. Route wire harness across rear of block. See Figure 3.
3. Use capscrew Part Number 3093923 to secure harness. See Figures 4, 5, and 6.
4. Connect oil pressure switch, Part Number 4924925, to wire harness, Part Number 5417037. See Figure 7
5. Install reducing adapter, Part Number 3976110, and oil pressure switch, Part Number 4924925, into fuel pump drive adapter.

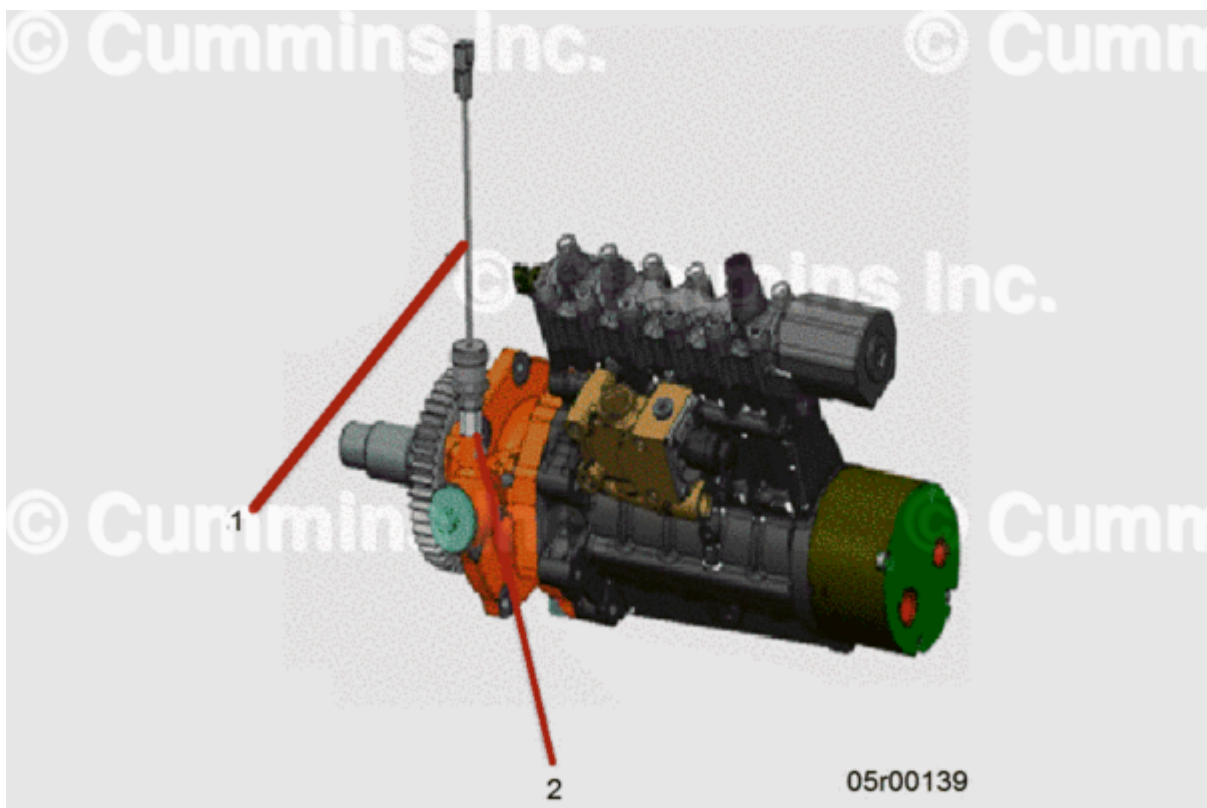

Figure 1, (1) Pre-Lube Pressure Switch, Part Number 4924925, (2) Reducing Adapter, Part Number 3976110.

Service Parts Availability

Kit Part Number 5473011 is available. See Table 1 for part numbers.

Table 1, Service Parts

Part Description	Quantity	Obsolete	Superseded	New Part Number
Pressure Switch	1	No	No	4924925
Reducing Adapter	1	No	No	3976110
Wiring Harness	1	No	No	5417037
Capscrew	5	No	No	3093923
Capscrew	1	No	No	3171713
Capscrew	1	No	No	3902460
Capscrew	2	No	No	3903990

Implemented for production. See Table 2.
