Description of Change

This document announces a new eliminator body design. New design has increased flange thickness and subsequently bolt length increases.

Reason for Change

An external oil leak has occurred on multiple machines, stemming from cracks around the bolt heads on the eliminator body (this is where the eliminator body bolts to the engine cylinder block). To improve reliability, a new oil eliminator body has been released to reduce the stresses at the crack location.

Service Instructions

New capscrew, Part Number 3902663, **must** be used when fitting the new eliminator, Part Number 6373355. See Table 1 for part number information.

Service Parts Availability

Service parts are available. See Table 1 for part numbers.

Table 1, Service Parts				
Part Description	Existing Part Number	Obsolete	Superseded	New Part Number
Eliminator filter	5540796	Yes	Yes	6373355
Screw, hexagon flange head cap	3914407	No	No	3902663
Part Compatibility New capscrew, Part Number 3902663, must be used when fitting the new eliminator, Part Number 6373355. See Table 1 for part number information.				
Part Identification The eliminator part number can be identified by the data plate on the component.				
Part Inventory Action Use existing part number inventory before using the new part number.				
Production Status Implemented for production. See Table 2.				
Table 2, Production Information				
ESN First		Build Date ¹	Plant	
33230192		26 October 2022	Daventry	
¹ Engine build date can be found on the engine dataplate.
