New Insulated Flexplate

New Insulated Flexplate

Warranty Statement

The information in this document has no effect on present warranty coverage or repair practices, nor does it authorize TRP or Campaign actions.

Contents

Product Affected

- QSK60 CM2150 MCRS

Description of Change

A new flexplate is now available and includes the following:

- Clamping plate rather than individual bushings at the crankshaft adapter to resin interface; this reduces the torsional vibration and bending loads absorbed by this joint increasing reliability.
- Press fit on the internal diameter allowing the alternator weight to be absorbed by this joint, reducing stresses in the clamping plate.
- Capscrew quantity has been increased from 15 to 20; this increases the torsional load capability.
- Increased crankshaft adapter length to provide increased support to the bolted joint area.

Reason for Change

Increased vibration and adverse noises during operation have been reported. The insulated flexplate membrane can move independently to the crankshaft adapter. An investigation identified this bolted joint experiences high torsional loading which caused fretting and enlarging of the holes.

Customer Communication

This flexplate is **only** required on Hitachi haul truck application.

Service Parts Availability

Table 1, Service Parts				
Part Description	Existing Part Number	Obsolete	Superseded	New Part Number
Insulated Flexplate	5541000	Yes	Yes	6315834

Part Identification

Part can be identified by the sticker located on the membrane. See Figure 1.

Figure 1, Flexplate Identification.

Part Inventory Action

Use existing part number inventory before using the new part number.

Production Status

Implemented for production. See Table 2.

Table 2, Production Information		
ESN First	Build Date ¹	Plant
33230674	16 December 2022	Daventry
¹ Engine build date can be found on the engine dataplate.
