Description of Change

A new heat shield design has been released for the single stage variant, which introduces an improved clearance for other components such as injector fuel supply line, low temperature aftercooling pipe, and turbocharger oil drain.

Reason for Change

- This change has come out of product improvement where some clearance issues were seen to cause malfunctions of different components (injector fuel supply line, low temperature aftercooling pipe, and turbocharger oil drain). The design was improved to reduce future malfunctions.
- Because of the complexity of the change, see the below graphics to understand the change in geometry for each option.

Option SH6726:
