Issue With Entering INSITE™ Electronic Service Tool Passwords on a Remote Desktop Connection	

Issue With Entering INSITE™ Electronic Service Tool Passwords on a Remote Desktop Connection

Core Issue

This Early Field Notification describes an issue with entering INSITE™ electronic service tool passwords on a remote desktop connection. It has been found that a remote desktop connection will prevent access to INSITE™ electronic service tool and passwords from being entered.

Confirmation

All engines supported by INSITE™ electronic service tool.

When attempting to open INSITE™ electronic service tool through a remote desktop connection, the program will prompt for a password to be entered. When trying to enter a password, an error message is given stating that, "The password entered is invalid", even though the password has been verified.
