P7100 and P8500 Light-Load Advance Injection Pumps

P7100 and P8500 Light-Load Advance Injection Pumps

Warranty Statement

The information in this document has no effect on present warranty coverage or repair practices, nor does it authorize TRP or Campaign actions.

Contents

This Technical Service Bulletin defines the use of the P7100 and P8500 light-load advance injection pumps on the QST30 based on rating.

The P7100 fuel injection pumps are now used on G1 and G2 QST30 ratings. The right-bank pump is Part Number 3093280; the left-bank pump is Part Number 3093281. The timing code for G1 and G2 with P7100 pumps is KT. Timing should be set at 23.5 degrees before top dead center with the number 1 right-bank piston on the compression stroke. Both injection pumps are installed at the same crankshaft position. Engines with P7100 pumps require a different ECM than the P8500 pumps previously used on G1 and G2 ratings, but other fuel system components (pump supports, high- or low-pressure fuel lines, injectors) remain the same. The P7100 injection pumps are installed on every G1 and G2 rating built after July 15, 2000.

QST30 engines rated G3, G4, and G5 now use P8500 light-load advance injection pumps. This pump uses a unique helix cut to advance injection timing during light-load operating conditions to reduce white smoke. The right-bank pump is Part Number 3093278 and the left-bank pump is Part Number 3093279. The **only** way to determine the difference between the P8500 and the P8500 light-load advance pumps is to read the part number on the pump dataplate. The part number is the first seven digits of the fourth line on the dataplate. Engines with P8500 light-load advance pumps require a different ECM than the P8500 pumps previously used, but other fuel system components remain the same. The P8500 light-load advance injection pumps are installed on every G3, G4, and G5 rating built after July 15, 2000.

New Control Parts Lists

Table 1, New Control Parts Lists for Configuration Change	
Injection Pumps	New Control Parts List Numbers
P7100	2839, 2949, 2968
P8500 light-load advance	2499, 2548, 2840, 2879, 2880
