Contents

This Technical Service Bulletin introduces a new part number for the QST30 industrial and 480CE Marine electronic control module (ECM). The new part number for the CM552 ECM is 4954430. The new ECM replaces the existing CM552 ECM, Part Number 3408576.

The module part number change is due to the obsolescence of some of the internal components of the ECM; there is no functional difference between the new and the old ECM.

The new ECM obsoletes and supersedes the old ECM.

Production use of this new module began on May 29, 2007 with engine serial number (ESN) first 37229155 for QST30 industrial engines. The 480CE Marine engine is no longer in production and therefore will **not** have any production use of the new module.

All existing QST30 Industrial and 480CE Marine calibrations for the previous CM552 ECM, Part Number 3408576, are **not** compatible with the new module, Part Number 4954430. New calibration revisions have been released and will be available beginning with the July 2007 INCAL™ CD-ROM. These new calibration revisions are also backwards compatible with all previous CM552 ECMs. **Only** calibrations from the July 2007 or newer INCAL™ CD-ROM can be used with the new ECM, Part Number 4954430.

Description	New Part Number	Old Part Number
ECM	4954430	3408576
