Cummins® Service Model Identification

Cummins® Service Model Identification

Warranty Statement

The information in this document has no effect on present warranty coverage or repair practices, nor does it authorize TRP or Campaign actions.

Contents

Introduction to Service Model Names

The purpose of this document is to introduce Cummins® Service Model Name. Prior to 2007, Cummins Inc. primarily relied on the marketing model name to identify products. As Cummins Inc. introduced more products, the marketing model names were found to be too generic and did **not** identify variations of a product with the same marketing model name. Beginning in 2007, Cummins Inc. started using service model names to:

- Match the correct Cummins® service information and tools to a specific product.
- Assist repair locations with finding service information when the product serial number (PSN), engine serial number (ESN), or system serial number (SSN) is **not** available.

The original service model name used a suffix with letters to designate emissions-related hardware/technology used for that product. The Cummins® Service Engine Model Product Identification procedure provided a description of that service model name strategy. Refer to Procedure 100-003 in Section E. (</qs3/pubsys2/xml/en/procedures/99/99-100-003.html>)

2013 Service Model Name

Beginning in 2013, a new service model name strategy was implemented, replacing the previous strategy. Limitations were found with the previous service model name strategy. Products that used the previous service model name will **not** be updated with new service model names. The Cummins® Service Engine Model Identification procedure describes this new service model name strategy. Refer to Procedure 100-005 in Section E.

(</qs3/pubsys2/xml/en/procedures/99/99-100-005.html>)

In addition to the new service model name strategy procedure, an additional new procedure was created, Cummins® Product Technology. This procedure can be used to identify the:

- Service model name for the product covered by the manual.
- Emission regulations the product was first released to meet.
- Hardware/technology used by the product.
- Market applications for which the product is used.

2017 Service Model Name

Beginning in 2017, an update was made to the service model name strategy to support a change to marketing model names. The change to the marketing model name was to remove the “IS” and “QS”, which previously could be used to differentiate automotive and industrial applications. To continue to support application identification, the service model name will have a new letter designation at the end of the suffix to identify the application type. The Cummins® Service Engine Model Identification (2017) procedure provides details. Refer to Procedure 100-008 in Section E. (</qs3/pubsys2/xml/en/procedures/99/99-100-008.html>) **Only** new products that use the new marketing model name will have an additional letter designation at the end of the suffix of the service model name.

Non-Engine Products

The Cummins® Service Transmission Model Identification procedure provides details of the service model name strategy to support transmissions. Refer to Procedure 344-004 in Section E. (</qs3/pubsys2/xml/en/procedures/99/99-344-004.html>)

List of Service Model Names

The tables below list the Cummins® products released with the new service model name and a link to the Cummins® Product Technology Procedure for that product.

To find a particular service model name quickly, utilize the search function on the computer by typing in the service model name. With an English keyboard and computer equipped with Windows™ operating system this is accomplished by simultaneously pressing the “Ctrl” key and the “F” key on the computer keyboard.

Document History

Date	Details
2013-4-29	Module Created
2016-9-7	Adding additional engine families. Added 2017 engine model name strategy.
2018-12-12	Updated QSG12 CM2350 G110 to QSG12/X12 CM2350 G110. Reference TSB140132.
2021-10-20	Corrected ISB6.7 CM2450 B155B to B6.7 CM2450 B155B.100-006 in Section E.
2022-3-16	Added bulletin number for ISZ13 CM2150 Z106B.
2022-5-11	Corrected hyperlink to 100-006 procedure for B4.5 CM2350 B129B.
2022-7-22	Added Battery Electric System section.
2022-7-27	Updated weblinks.
2023-10-6	Updated tables.
2024-9-26	Added EV111B bulletin number and hyperlink.
2024-10-4	Added F156C bulletin number and hyperlink.
2024-10-8	Added K161G bulletin number and hyperlink.
2024-10-30	Added F157C bulletin number and hyperlink.
2025-10-21	Added EV117B bulletin number and hyperlink.
2026-7-16	Updated link to X15 CM2450 X160C CPT procedure so that it is functional. Added G12/X12 CM2450 G119C to G series table.
