Contents

Product Affected

The products listed below may **not** include all products affected by this Technical Service Bulletin. If the product being serviced uses the parts referenced by this Technical Service Bulletin, even though the product is not listed, the information in this Technical Service Bulletin does apply.

- C8.3 (**Only** Bus Applications)
- GTA855 (All Versions)
- ISM CM570
- ISM CM876
- QSM11
- ISX15 CM2250
- ISX15 CM2350 X101
- QSX15 (All Versions)
- N14 Celect Plus™
- K19 (All Versions)
- QST30 (All Versions)
- QSK19 (All Versions)
- GTA38 (All Versions)
- K38 (All Versions)
- KTA38GC (All Versions)
- QSK38 (All Versions)
- GTA50 (All Versions)
- K50 (All Versions)
- QSK38 (All Versions)
- QSK50 (All Versions)
- QSK45 (All Versions)
- QSK60 (All Versions)
- QSK60G (All Versions)
- QSK78 (All Versions)

- QSK95 (All Versions)

Description of Change

This document informs the field of coolant filtration upgrades. The new coolant filters use StrataPore® media instead of cellulose media.

Reason for Change

The upgraded filtration options offer higher capacity, improved filtration performance, and extended maintenance intervals.

Service Parts Availability

Service parts are available. See Table 1 for part numbers.

Table 1, Coolant Filter Part Numbers					
Original Filtration Part Numbers			Upgraded Filtration Part Numbers		
Description	Cummins® Part Number	Fleetguard® Part Number	Description	Cummins® Part Number	Fleetguard® Part Number
On-engine, 15 DCA units, cellulose media	3100308	WF2075	On-engine, 15 DCA units, StrataPore® media	3098688	WF2121
On-engine, no DCA units, cellulose media	3827423	WF2077	On-engine, no DCA units, no StrataPore® media*	3098690	WF2123
* Only coolant filters with no diesel coolant additive (DCA) should be used in combination with organic acid technology (OAT) coolant.					

Part Compatibility

The new upgraded coolant filters are backward compatible.

Part Identification

The new upgraded coolant filters can be distinguished using the part number printed on the filter can.

Part Structure

The upgraded filtration part numbers do **not** obsolete and supersede the existing filtration part numbers. The existing filtration part numbers will remain available.
