Description of Change

In addition to the already-available 0.5 mm oversized cylinder head gasket, a 0.25 mm and 0.75 mm oversized gaskets are available. There are new identification features on these oversized gaskets in order to differentiate them:

- All oversized cylinder head gaskets have a single isolated notch (shown in bottom left corner of Figure 1 below)
- The number of notches in the opposite corner of the cylinder head gasket represent the size:
 - 0.25mm oversized cylinder head gasket has one notch in this area
 - 0.5mm oversized cylinder head gasket has two notches in this area
 - 0.75mm oversized cylinder head gasket has three notches in this area

Part Identification

For remaining stock of the existing cylinder head gasket design, Figure 1 below has been included for reference. Note there are no notches at the top right corner, but a notch at the bottom left corner is still present, this is a 0.5mm oversized gasket.

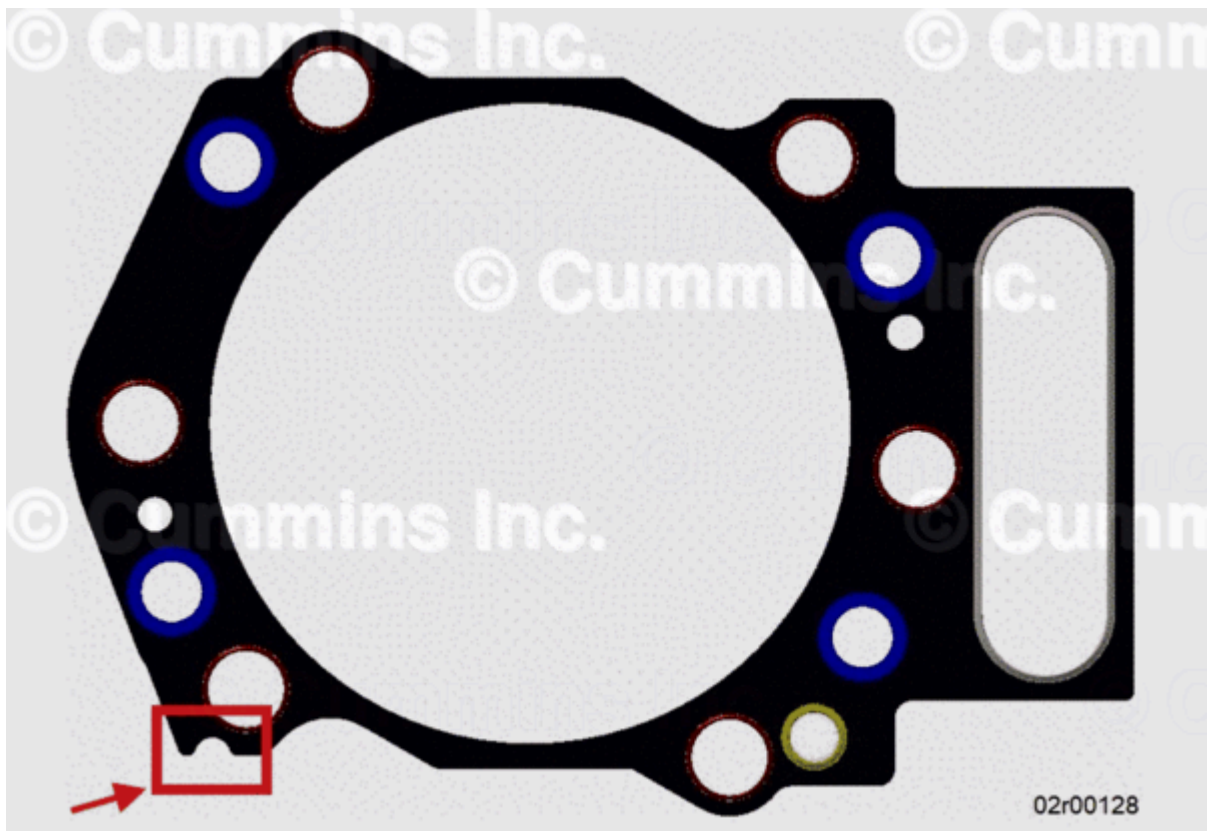

Figure 1, Existing Oversized Cylinder Head Gasket Design Showing Notch at Bottom Left (For Differentiation Purposes Only).

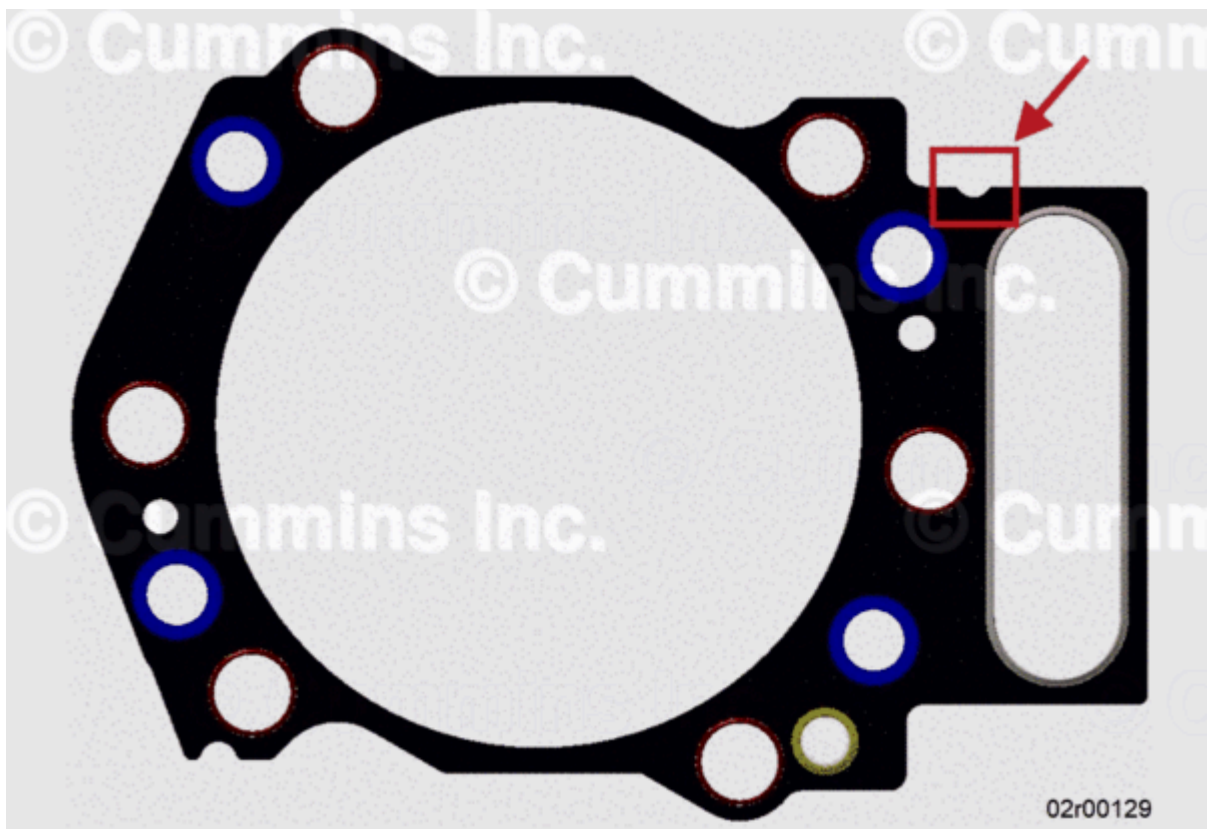

Figure 2, New 0.25 mm Oversized Cylinder Head Gasket Showing One Notch at Upper Right.

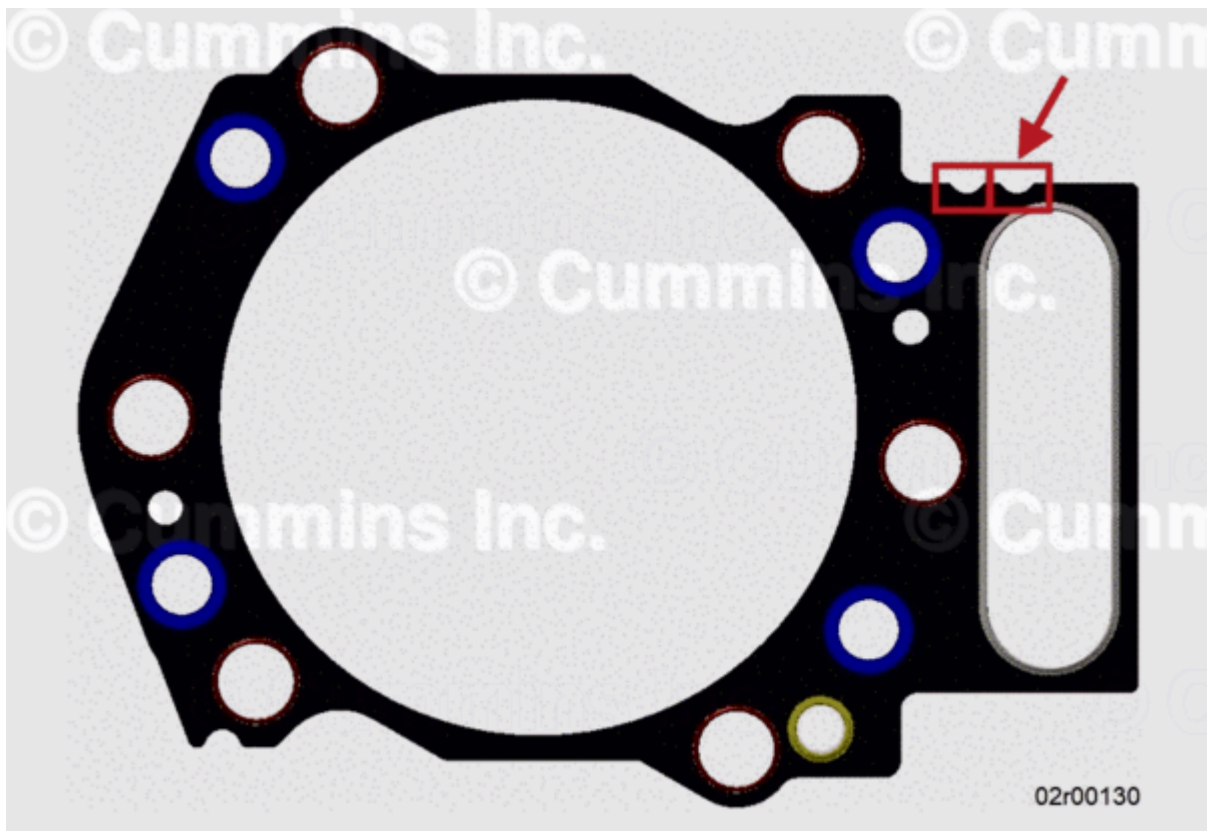

Figure 3, New 0.5 mm Oversized Cylinder Head Gasket Showing Two Notches at Upper Right.

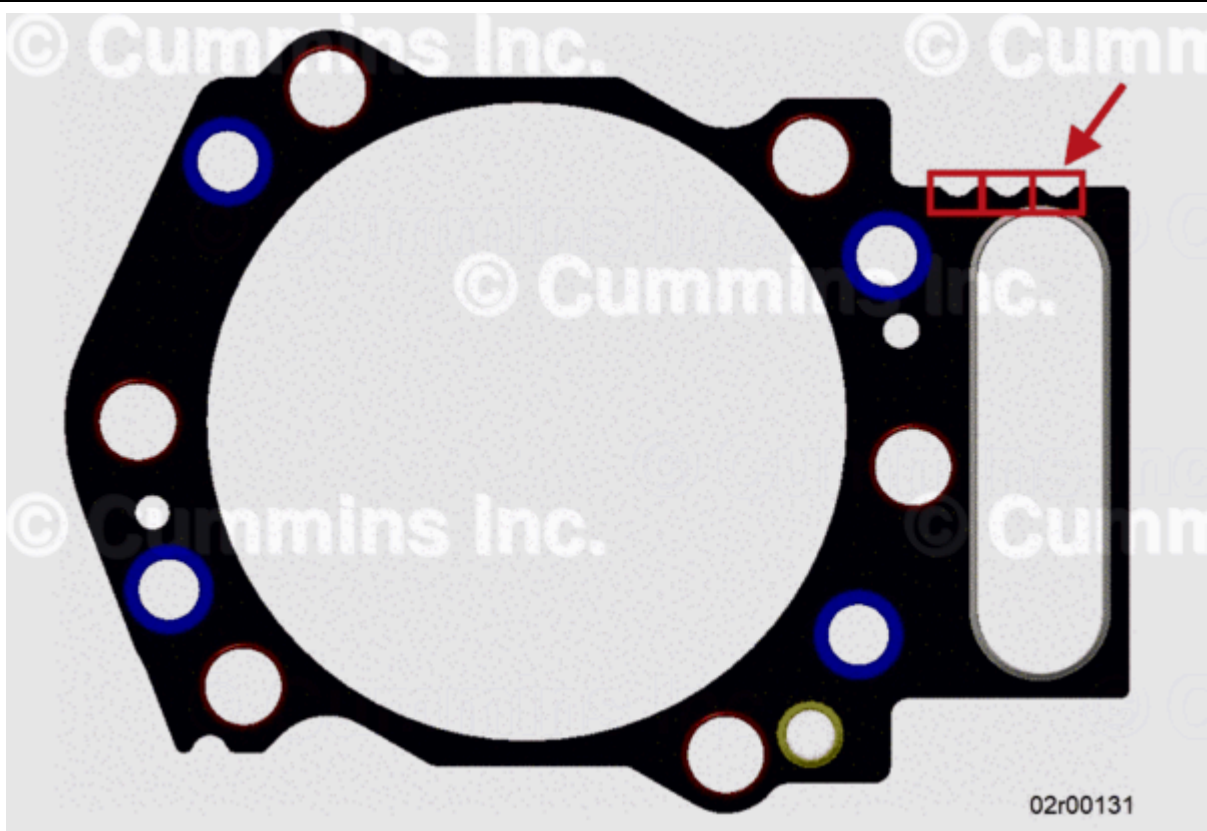

Figure 4, New 0.75 mm Oversized Cylinder Head Gasket Showing Three Notches at Upper Right.
