- K50 (All Versions)
- KTA38 (All Versions)
- KTA50 (All Versions)
- KTAA38 (All Versions)
- QSK38 (All Versions)
- QSK50 (All Versions)

Description of Change

- Changes have been made to the coolant thermostat housing and cover plate assembly as part of a change to an edge bonded rubber gasket in place of o-rings.
- Change removes the o-ring counter bores on the cover plate and removes and obsoletes the o-ring compatible coolant thermostat housing.
- The o-rings are still available through parts.cummins.com to maintain the o-ring design. Reference Table 1 below for part number information.

Reason for Change

Changes made between 2011 and 2018 to the edge bonded gasket as part of a parts and option standardization project.

Service Instructions

- O-rings for the o-ring design assembly are still available to purchase, ensuring support for engines and customers still using the o-ring design. See Table 1 below,
- If the either the coolant thermostat housing, or the Cover Plate requires changing, then the customer will need to use the gasket with the New Part Numbers listed in Table 1.

Service Parts Availability

Service parts are available. See Table 1 for part numbers.

Table 1, Service Parts

Part Description	Existing Part Number	Obsolete	Superseded	New Part Number
PLATE, COVER	3003379	Yes	Yes	5376167
HOUSING, THERMOSTAT	3035844	Yes	Yes	4372912
SEAL, ORING	3818885	No	No	-
GASKET	-	-	-	3650106

Part Compatibility

- The new gasket is **not** backwards compatible with the existing coolant thermostat housing.
- New coolant thermostat housing is compatible with the existing cover plate when the cover plate is fitted in reverse orientation and used with a gasket.

Part Inventory Action

Use existing part number inventory before using the new part number.
